<b>List of Contributors</b>	<b>xiii</b>
<b>Preface</b>	<b>xv</b>
<b>1 Inertial Navigation Systems</b>	<b>1</b>
<i>Michael S. Braasch</i>	
1.1 Introduction	1
1.2 The Accelerometer Sensing Equation	2
1.3 Reference Frames	3
1.3.1 True Inertial Frame	3
1.3.2 Earth-Centered Inertial Frame or <i>i</i> -Frame	3
1.3.3 Earth-Centered Earth-Fixed Frame or <i>e</i> -Frame	3
1.3.4 Navigation Frame	3
1.3.5 Body Frame	4
1.3.6 Sensor Frames ( <i>a</i> -Frame, <i>g</i> -Frame)	5
1.4 Direction Cosine Matrices and Quaternions	5
1.5 Attitude Update	6
1.5.1 Body Frame Update	7
1.5.2 Navigation Frame Update	8
1.5.3 Euler Angle Extraction	9
1.6 Navigation Mechanization	10
1.7 Position Update	11
1.8 INS Initialization	12
1.9 INS Error Characterization	14
1.9.1 Mounting Errors	14
1.9.2 Initialization Errors	14
1.9.3 Sensor Errors	14
1.9.4 Gravity Model Errors	14

1.9.5	<i>Computational Errors</i>	15
1.9.6	<i>Simulation Examples</i>	15
1.10	Calibration and Compensation	23
1.11	Production Example	24
	References	25
<b>2</b>	<b>Satellite Navigation Systems</b>	<b>26</b>
	<i>Walter Geri, Boris V. Shebshaevich and Matteo Zanzi</i>	
2.1	Introduction	26
2.2	Preliminary Considerations	27
2.3	Navigation Problems Using Satellite Systems	27
2.3.1	<i>The Geometrical Problem</i>	28
2.3.2	<i>Reference Coordinate Systems</i>	29
2.3.3	<i>The Classical Mathematical Model</i>	33
2.4	Satellite Navigation Systems (GNSS)	38
2.4.1	<i>The Global Positioning System</i>	38
2.4.2	<i>GLONASS</i>	51
2.4.3	<i>Galileo</i>	56
2.4.4	<i>BeiDou (Compass)</i>	61
2.4.5	<i>State and Development of the Japanese QZSS</i>	63
2.4.6	<i>State and Development of the IRNSS</i>	64
2.5	GNSS Observables	65
2.5.1	<i>Carrier-Phase Observables</i>	65
2.5.2	<i>Doppler Frequency Observables</i>	68
2.5.3	<i>Single-Difference Observables</i>	69
2.5.4	<i>Double-Difference Observables</i>	71
2.5.5	<i>Triple-Difference Observables</i>	72
2.5.6	<i>Linear Combinations</i>	72
2.5.7	<i>Integer Ambiguity Resolution</i>	74
2.6	Sources of Error	75
2.6.1	<i>Ionosphere Effects</i>	77
2.6.2	<i>Troposphere Effects</i>	80
2.6.3	<i>Selective Availability (SA) Effects</i>	81
2.6.4	<i>Multipath Effects</i>	82
2.6.5	<i>Receiver Noise</i>	82
2.7	GNSS Receivers	82
2.7.1	<i>Receiver Architecture</i>	82
2.7.2	<i>Carrier Smoothing</i>	85
2.7.3	<i>Attitude Estimation</i>	87
2.7.4	<i>Typical Receivers on the Market</i>	88
2.8	Augmentation Systems	90
2.8.1	<i>Differential Techniques</i>	90
2.8.2	<i>The Precise Point Positioning (PPP) Technique</i>	92
2.8.3	<i>Satellite-Based Augmentation Systems</i>	93
2.9	Integration of GNSS with Other Sensors	97
2.9.1	<i>GNSS/INS</i>	98

2.10 Aerospace Applications 100

    2.10.1 *The Problem of Integrity* 101

    2.10.2 *Air Navigation: En Route, Approach, and Landing* 103

    2.10.3 *Surveillance and Air Traffic Control (ATC)* 103

    2.10.4 *Space Vehicle Navigation* 105

References 105

**3 Radio Systems for Long-Range Navigation 109**

*Anatoly V. Balov and Sergey P. Zarubin*

3.1 Introduction 109

3.2 Principles of Operation 111

3.3 Coverage 116

3.4 Interference in VLF and LF Radio-Navigation Systems 118

3.5 Error Budget 122

    3.5.1 *Loran-C and CHAYKA Error Budget* 122

    3.5.2 *ALPHA and OMEGA Error Budget* 124

    3.5.3 *Position Error* 125

3.6 LF Radio System Modernization 126

    3.6.1 *EUROFIX—Regional GNSS Differential Subsystem* 127

    3.6.2 *Enhanced Loran* 129

    3.6.3 *Enhanced Differential Loran* 130

3.7 User Equipment 132

References 138

**4 Radio Systems for Short-Range Navigation 141**

*J. Paul Sims and Joseph Watson*

4.1 Overview of Short-Range Navigational Aids 141

4.2 Nondirectional Radio Beacon and the “Automatic Direction Finder” 142

4.3 VHF Omni-Directional Radio Range 148

    4.3.1 *Basic VOR Principles* 148

    4.3.2 *The Doppler VOR* 149

4.4 DME and TACAN Systems 154

    4.4.1 *DME Equipment* 154

    4.4.2 *Tactical Air Navigation* 156

    4.4.3 *The VORTAC Station* 156

    4.4.4 *The Radiotechnical Short-Range Navigation System* 158

    4.4.5 *Principles of Operation and Construction of the RSBN System* 159

References 160

**5 Radio Technical Landing Systems 162**

*J. Paul Sims*

5.1 Instrument Landing Systems 162

    5.1.1 *The Marker Beacons* 162

## 7 Homing Devices 202

	<i>Georgy V. Antsev and Valentine A. Sarychev</i>	
7.1	<i>Introduction</i>	202
7.2	<i>Definition of Homing Devices</i>	205
7.2.1	<i>Homing Systems for Autonomous and Group Operations</i>	205
7.2.2	<i>Guidance and Homing Systems</i>	206
7.2.3	<i>Principles and Classification of Homing Devices</i>	207
7.3	<i>Homing Device Functioning in Signal Fields</i>	212
7.3.1	<i>Characteristics of Homing Device Signal Fields</i>	212
7.3.2	<i>Optoelectronic Sensors for Homing Devices</i>	214
7.3.3	<i>Radar Homing Devices</i>	215

7.4 Characteristics of Homing Methods 221  
 7.4.1 *Aerospace Vehicle Homing Methods* 221  
 7.4.2 *Homing Device Dynamic Errors* 226  
 7.5 Homing Device Efficiency 227  
 7.5.1 *Homing Device Accuracy* 228  
 7.5.2 *Homing Device Dead Zones* 229  
 7.6 Radio Proximity Fuze 230  
 7.7 Homing Device Functioning Under Jamming Conditions 232  
 7.8 Intelligent Homing Devices 238  
 References 240

**8 Optimal and Suboptimal Filtering in Integrated Navigation Systems 244**

*Oleg A. Stepanov*  
 8.1 Introduction 244  
 8.2 Filtering Problems: Main Approaches and Algorithms 244  
 8.2.1 *The Least Squares Method* 245  
 8.2.2 *The Wiener Approach* 246  
 8.2.3 *The Kalman Approach* 249  
 8.2.4 *Comparison of Kalman and Wiener Approaches* 252  
 8.2.5 *Beyond the Kalman Filter* 254  
 8.3 Filtering Problems for Integrated Navigation Systems 258  
 8.3.1 *Filtering Problems Encountered in the Processing of Data from Systems Directly Measuring the Parameters to be Estimated* 259  
 8.3.2 *Filtering Problems in Aiding a Navigation System (Linearized Case)* 264  
 8.3.3 *Filtering Problems in Aiding a Navigation System (Nonlinear Case)* 266  
 8.4 Filtering Algorithms for Processing Data from Inertial and Satellite Systems 271  
 8.4.1 *Inertial System Error Models* 272  
 8.4.2 *The Filtering Problem in Loosely Coupled INS/SNS* 277  
 8.4.3 *The Filtering Problem in Tightly Coupled INS/SNS* 278  
 8.4.4 *Example of Filtering Algorithms for an Integrated INS/SNS* 281  
 8.5 Filtering and Smoothing Problems Based on the Combined Use of Kalman and Wiener Approaches for Aviation Gravimetry 285  
 8.5.1 *Statement of the Optimal Filtering and Smoothing Problems in the Processing of Gravimeter and Satellite Measurements* 286  
 8.5.2 *Problem Statement and Solution within the Kalman Approach* 288  
 8.5.3 *Solution Using the Method of PSD Local Approximations* 291  
 Acknowledgment 295
